

About ^{SAN ROKU GO}365 Suido (Earthquake-Resistant Antifreeze Water Station)

365 Suido (earthquake-resistant antifreeze water station) was introduced in 2024 to commemorate the 90th anniversary of Morioka City waterworks, as part of the city's disaster preparedness efforts. It serves as a public drinking fountain, providing access to Morioka's tap water.

Designed to function even in the event of earthquakes or other disasters, it ensures a continuous water supply **24 hours a day, 365 days a year**. Also, its antifreeze construction makes it reliable even in cold climates like Morioka.

Key Features

1. Earthquake Resistant

Made with pipes constructed to resist seismic activity, ensuring safe water access even during disasters.

2. Frost Resistant

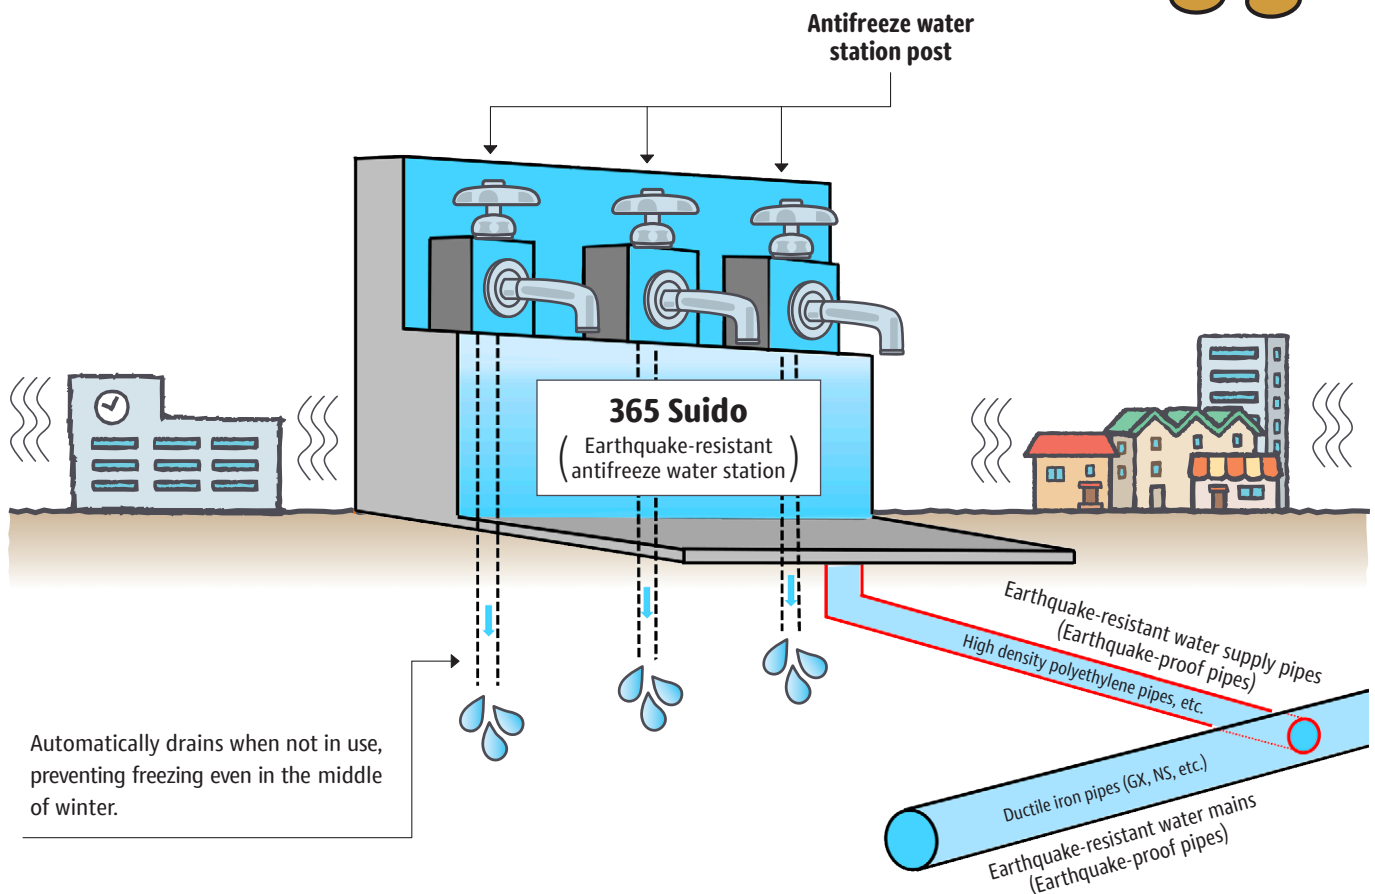

Designed to resist freezing, providing a stable water supply even in harsh winter conditions.

3. Impact Resistant

Protected by a concrete casing, making it highly durable and resistant to damage.

4. Operates During Power Outages

Functions without electricity, ensuring access to water even during blackouts.

Installed Locations

365 Suido (earthquake-resistant antifreeze water station) will be installed at evacuation sites, such as elementary and junior high schools.

Locations will be announced on the Morioka City Waterworks & Sewerage Bureau website.

[Locations]

1. Morioka City Tourism and Culture Exchange Center "Plaza Odette"
(1-1-10 Nakanohashi-dori, Morioka)

Installed in 2024

2. Morioka City Daijiji Elementary School (Daijiji-cho)

Scheduled for installation in 2025
